## PRIZM NE SOCIAL GROUPS

PRIZM NE's 14 social groups are based on urbanicity and affluence, two important variables used in the production of PRIZM NE.

First, segments are placed in one of four urbanicity (Urban, Second City, Suburbs, Town & Rural) categories. Urbanicity is determined by the population density of an area and its neighboring areas. A population density score ranging from one (low density) to 99 (high density) is assigned to each area.

Urban areas (U) have population density scores between 85 and 99. They include both the downtowns of major cities and surrounding neighborhoods. These areas often extend beyond the city limits and into surrounding jurisdictions.

Suburbs (S) have population density scores between 40 and 90, and are clearly dependent on urban areas or second cities. Population density rises as you approach the city, and decreases as you move away from it.

Finally, within each category, all the segments are sorted into groups based on affluence, another powerful demographic predictor of consumer behavior. All of the 66 segments are grouped into these 14 social groups and color-coded accordingly.

### ***U1 - Urban Uptown***

The five segments in Urban Uptown are home to the nation's wealthiest urban consumers. Members of this social group tend to be affluent to middle class, college educated and ethnically diverse, with above-average concentrations of Asian and Hispanic Americans. Although this group is diverse in terms of housing styles and family sizes, residents share an upscale urban perspective that's reflected in their marketplace choices. Urban Uptown consumers tend to frequent the arts, shop at exclusive retailers, drive luxury imports, travel abroad and spend heavily on computer and wireless technology.

<b>Total Percent of U1</b>	<b>45.71%</b>	<b>49.38%</b>

### ***U2 - Midtown Mix***

Diversity is the hallmark of Midtown Mix, a group of midscale urban segments. It's the most ethnically diverse social group, besides containing a mix of singles and couples, homeowners and renters, college alumnae and high school graduates. In U2, the households are dominated by childless consumers who pursue active social lives—frequenting bars, health clubs and

restaurants at high rates—listen to progressive music, drive small imports and acquire the latest consumer electronics.

<b>Total Percent of U2</b>	<b>41.23</b>	<b>36.83</b>

### ***U3 - Urban Cores***

Urban Cores segments are characterized by relatively modest incomes, educations and rental apartments, but affordable housing is part of the allure for the group's young singles and aging retirees. One of the least affluent social groups, U3 has a high concentration of Hispanics and African-Americans, and surveys indicate a fondness for both ethnic and mainstream media and products. Among the group's preferences: TV news and daytime programming, Spanish and black radio, telephony services and pagers, cheap fast food and high-end department stores.

### ***S1 - Elite Suburbs***

The most affluent suburban social group, Elite Suburbs is a world of six-figure incomes, post-graduate degrees, single-family homes and managerial and professional occupations. The segments here are predominantly white with significant concentrations of well-off Asian Americans. Befitting their lofty salaries, S1 members are big consumers of large homes, expensive clothes, luxury cars and foreign travel. Despite representing a small portion of the U.S. population, they hold a large share of the nation's personal net worth.

### ***S2 - The Affluentials***

The six segments in The Affluentials are one socioeconomic rung down from the Elite Suburbs—with a 25 percent drop in median income—but their residents still enjoy comfortable, suburban lifestyles. The median income in S2 is nearly \$60,000, the median home value is about \$200,000, and the mostly couples in this social group tend to have college degrees and white-collar jobs. Asian Americans make up an important minority in these predominantly white segments. As consumers, The Affluentials are big fans of health foods, computer equipment, consumer electronics and the full range of big-box retailers.

### ***S3 - Middleburbs***

The five segments that comprise Middleburbs share a middle-class, suburban perspective, but there the similarity ends. Two groups are filled with very young residents, two are filled with seniors and one is middle-aged. In addition, S3 includes a mix of both, homeowners and renters as well as high school graduates and college alums. With good jobs and money in their jeans, the members of Middleburbs tend to have plenty of discretionary income to visit nightclubs and casual-dining restaurants, shop at midscale department stores, buy dance and easy listening CDs by the dozen and travel across the U.S. and Canada.

### ***S4 - Inner Suburbs***

The four segments in the Inner Suburbs social group are concentrated in the inner-ring suburbs of major metros—areas where residents tend to be high school educated, unmarried and lower-middle class. There's diversity in this group, with segments that are racially mixed, divided evenly between homeowners and renters and filled with households that are either young or aging in place. However, the consumer behavior of the S4 segments are dominated by older Americans who enjoy social activities at veterans clubs and fraternal orders, TV news and talk shows, and shopping at discount department stores.

## PRIZM Social Group Comparison for 44107

**PRIZM NE LIFESTAGE GROUPS**

The 11 Lifestage Groups are classified by three levels of affluence (low, moderate, high) and by one of three primary categories of age-and-children combinations: "Younger Years": Largely under age 35, these households have few-if any-children. Households tend to be singles, although there are also couples that fall into this Lifestage; "Family Life": Households with kids meet the primary criteria for this Lifestage. While the householder age range is broad-25 to 54-and there are some couples that fall into this Lifestage, the vast majority of households have at least one child under 18; "Mature Years": Largely over age 45, these are empty-nest households-mostly couples whose kids have flown the coop.

***Y1 - Midlife Success***

The eight segments in Midlife Success typically are filled with childless singles and couples in their thirties and forties. The wealthiest of the Younger Years class, this group is home to many white, college-educated residents who make six-figure incomes at executive and professional jobs but also extends to more middle class segments. Most of these segments are found in suburban and exurban communities, and consumers here are big fans of the latest technology, financial products, aerobic exercise and travel.

***Y2 - Young Achievers***

Young, hip singles are the prime residents of Young Achievers, a lifestage group of twentysomethings who've recently settled in metro neighborhoods. Their incomes range from working-class to well-to-do, but most residents are still renting apartments in cities or close-in suburbs. These seven segments contain a high percentage of Asian singles, and there's a decidedly progressive sensibility in their tastes as reflected in the group's liberal politics, alternative music and lively nightlife. Young Achievers segments are twice as likely as the general population to include college students living in group quarters.

**Y3 - Striving Singles**

The seven segments in Striving Singles make up the most downscale of the Younger Years class. Centered in exurban towns and satellite cities, these twentysomething singles typically have low incomes—often under \$25,000 a year—from service jobs or part-time work they take on while going to college. Housing for this group consists of a mix of cheap apartment complexes, dormitories and mobile homes. As consumers, the residents in these segments score high for outdoor sports, movies and music, fast food and inexpensive cars.

**F1 - Accumulated Wealth**

The presence of children is the defining characteristic of the segments in the Family Life class. The three segments in Accumulated Wealth contain the wealthiest families, mostly college-educated, white-collar Baby Boomers living in sprawling homes beyond the nation's beltways. These large family segments are filled with upscale professionals—the group's median income is nearly six figures—who have the disposable cash and sophisticated tastes to indulge their children with electronic toys, computer games and top-of-the-line sporting equipment. The adults in these households are also a prime audience for print media, expensive cars and frequent vacations—often to theme parks as well as European destinations.

**F2 - Young Accumulators**

Compared to the Accumulated Wealth group, the five segments in Young Accumulators are slightly younger and less affluent than their upscale peers. Ethnically diverse, these households include an above-average number of Hispanic and Asian Americans. Adults typically have college educations and work a mix of white-collar managerial and professional jobs. Found mostly in suburban and exurban areas, the large families in Young Accumulators have fashioned comfortable, upscale lifestyles in their mid-sized homes. They favor outdoor sports, kid-friendly technology and adult toys like campers, powerboats and motorcycles. Their media tastes lean towards cable networks targeted to children and teenagers.

### ***F3 - Mainstream Families***

Mainstream Families refers to a collection of seven segments of middle- and working-class child-filled households. While the age range of adults is broad—from 25 to 54—most families have at least one child under 18. And residents in this exurban group share similar consumption patterns, living in modestly priced homes—including mobile homes—and ranking high for owning three or more cars. As consumers, Mainstream Families maintain lifestyles befitting large families in the nation's small towns: lots of sports, electronic toys, groceries in bulk and televised media.

### ***F4 - Sustaining Families***

Sustaining Families is the least affluent of Family Life groups, an assortment of segments that range from working-class to decidedly downscale. Ethnically mixed, with a high percentage of African American, Asian and Hispanic families, these segments also display geographic diversity—from inner cities to some of the most isolated communities in the nation. Most adults hold blue-collar and service jobs, earning wages that relegate their families to small, older apartments and mobile homes. And the lifestyles are similarly modest: Households here are into playing games and sports, shopping at discount chains and convenience stores, and tuning into nearly everything that airs on TV and radio.

### ***M1 - Affluent Empty Nests***

While those on the "MTV side" of fifty may debate their inclusion in this group, Americans in the Mature Years tend to be over 45 years old and living in houses that have empty-nested. The four wealthiest segments in this group are classified Affluent Empty Nests, and they feature upscale couples who are college educated, hold executive and professional positions and are over 45. While their neighborhoods are found across a variety of landscapes—from urban to small-town areas—they all share a propensity for living in large, older homes. With their children out of the house, these consumers have plenty of disposable cash to finance active lifestyles rich in travel, cultural events, exercise equipment and business media. These folks are also community activists who write politicians, volunteer for environmental groups and vote heavily in elections.

### ***M2 - Conservative Classics***

College educated, over 55 years old and upper-middle-class, the six segments in Conservative Classics offer a portrait of quiet comfort. These childless singles and couples live in older suburban homes with two cars in the driveway and a wooden deck out back. For leisure at home, they enjoy gardening, reading books, watching public television and entertaining neighbors over barbecues. When they go out, it's often to a local museum, the theater or a casual-dining restaurant like the Olive Garden or Lone Star Steakhouse.

### ***M3 - Cautious Couples***

Another large group of Mature Years segments is Cautious Couples, featuring an over-55-year-old mix of singles, couples and widows. Widely scattered throughout the nation, the residents in these seven segments typically are working-class and white, with some college education and a high rate of homeownership. Given their blue-collar roots, Cautious Couples today pursue sedate lifestyles. They have high rates for reading, travel, eating out at family restaurants and pursuing home-based hobbies like coin collecting and gardening.

### ***M4 - Sustaining Seniors***

Sustaining Seniors consists of nine segments filled with older, economically challenged Americans. Racially mixed and dispersed throughout the country, they all score high for having residents who are over 65 years old and household incomes under \$25,000. Many are single or widowed, have modest educational achievement and live in older apartments or small homes. On their fixed incomes, they lead low-key, home-centered lifestyles. They're big on watching TV, gardening, sewing and
